Samantha Oh

571-396-1318 | sgoh6@uw.edu | linkedin.com/in/samantha-oh/

Education

University of Washington — Seattle, WA
Bachelor of Science in Informatics: Data Science — *June 2029*

Relevant Coursework

- CS Data Structures & Algorithms
- Probability 1
- Linear Algebra
- Client Side Development
- Foundations of Data Science
- Product Management

Experience

Agentic AI Engineering Intern — June 2026 – August 2026
CACI International Inc. — *Chantilly, VA*

- Built LLM-powered AI agents in Python using the Agno framework, applying containerization with Docker to streamline analysis of government contract documents
- Designed custom MCP tools and RAG pipelines integrated via REST APIs on a vector knowledge base; collaborated in an Agile environment with iterative testing and code reviews
- Developed agentic workflows that automated document analysis, cutting contract review time from days to an hour

Software Development Intern — June 2024 – August 2024
NT Concepts — *Vienna, VA*

- Developed and enhanced 5 UI features using React, Redux, JavaScript, and CSS in a Git version-controlled Agile sprint workflow
- Wrote 15+ Jest unit tests & participated in peer code reviews to verify component logic and maintain code quality
- Collaborated cross-functionally via Azure DevOps, Jira, and Confluence
- Delivered sprint demos to 90+ stakeholders showcasing functional progress

Information Systems Researcher — June 2025 – Aug 2025
George Mason University — *Remote*

- Collaborated with Dr. Xie to improve UI features on an Asian grocery app, applying A/B testing, regression analysis, and Python-based marketing analytics (Jieba, Requests)
- Published abstract in George Mason University's Journal of Student-Scientists' Research

Projects

Sip - Cafe Connection App | *React, Firebase, React Leaflet, CSS, JavaScript, GitHub*

- Built Updates and Profile pages with real-time Firebase data synchronization
- Developed responsive navigation and a mobile-first drawer using React and custom CSS
- Implemented interactive maps and friend filtering; collaborated across GitHub feature branches

AI Assisted Road Inspection Platform | *React, Vite, React Leaflet, Python, FastAPI, YOLO11, SQLite*

- Fine-tuned YOLO11 on 4,805 labeled road images, using a 3,844-image training set and 961-image validation set, to detect 4 road-damage categories
- Built an interactive mapping pipeline that retrieves and analyzes up to 30 Mapillary images per scan, storing candidate issues with bounding boxes, confidence scores, and approximate locations.
- Developed 3 role-based workflows—reviewer, coordinator, and crew—for evidence verification, work-order assignment, and repair tracking

Leadership

Director of PR | *Informatics Undergraduate Association (IUGA)* — April 2026 - present

- Lead PR and marketing strategy for IUGA as Director of PR, overseeing campaign development for events
- Spearheaded marketing campaign for iFormal, an event drawing 250 attendees, coordinating promotional content

Technical Skills

Languages: Python, Java, JavaScript, SQL, R, Swift, HTML/CSS
Frameworks/Libraries: React, FastAPI, React Leaflet, YOLO, Agno, Electron, JUnit, Jest
Platforms/Tools: Firebase, SQLite, AWS, Docker, Vite, Vercel, Google Colab, REST APIs
Development/Design: Git, GitHub, GitLab, VS Code, Xcode, Claude Code, Codex, Jira, Figma, Agile/Scrum
