

Samantha Oh

571-396-1318 | sgoh6@uw.edu | [linkedin.com/in/samantha-oh/](https://www.linkedin.com/in/samantha-oh/)

EDUCATION

University of Washington

Bachelor of Science in Informatics: Data Science

Seattle, WA

June 2029

RELEVANT COURSEWORK

- CS Data Structures & Algorithms
- Linear Algebra
- Foundations of Data Science
- Probability 1
- Client Side Development
- Product Management

EXPERIENCE

Agentic AI Engineering Intern

June 2026 – August 2026

CACI International Inc.

Chantilly, VA

- Built LLM-powered agents in Python using the Agno framework and Docker to automate analysis of government contract documents
- Designed custom MCP tools and RAG pipelines backed by a vector knowledge base to replace manual contract review workflows
- Integrated Amazon Bedrock for model hosting, cutting contract review time from days to 1-2 hours

Software Development Intern

June 2024 – August 2024

NT Concepts

Vienna, VA

- Developed and enhanced 5 UI features for a Electron web application using React, Redux, JavaScript, and CSS
- Developed 15+ Jest unit tests to verify React component logic and state management
- Participated in Agile sprints and daily stand ups, gaining proficiency in Azure DevOps, Jira, & Confluence
- Delivered sprint demos to 90+ stakeholders showcasing functional progress

Information Systems Researcher

June 2025 – Aug 2025

George Mason University

Remote

- Collaborated with Dr. Xie to improve UI features on an Asian grocery app, applying A/B testing, regression analysis, and Python-based marketing analytics (Jieba, Requests)
- Published abstract in George Mason University's Journal of Student-Scientists' Research

PROJECTS

Music Recommendation System | *Python, Pandas*

- Engineered a music recommendation system using logistic regression and neural networks to predict user preferences, comparing model performance through evaluation metrics
- Cleaned song data using collaborative and comparative filtering to create more accurate predictions

Sip - Cafe Connection App | *React, Firebase, React-Leaflet, CSS, HTML, JavaScript, GitHub*

- Developed the Updates and Profile pages for a group café-based social app, integrating Firebase for live data sync
- Designed and implemented a state-driven NavBar with a mobile-first navigation drawer, writing custom responsive CSS for a consistent experience across screen sizes
- Built interactive maps using react-leaflet and friend-filtering functionality; collaborated with a team using GitHub for version control to manage and merge feature work

GSU Course Registration System Redesign | *Jira, Agile/Scrum methodologies*

- Contributed to a full redesign proposal for a university course registration system, developing a Business Requirements Document (BRD) and product vision to guide scope and goals
- Created data flow diagrams (DFDs) and a data dictionary, and built a Jira backlog with sprint planning to organize development work

LEADERSHIP

Director of PR | *Informatics Undergraduate Association (IUGA)*

April 2026 - present

- Lead PR and marketing strategy for IUGA as Director of PR, overseeing campaign development for events
- Spearheaded marketing campaign for iFormal, an event drawing 250 attendees, coordinating promotional content

TECHNICAL SKILLS

Languages: Python, Java, R, HTML/CSS, JavaScript, Swift

Developer Tools: VS Code, XCode

Technologies/Frameworks: Agno, AWS, Docker, Electron, GitHub, JUnit, Jest, Figma
